PROFESSIONAL OVERVIEW

Subir Baruah is an education, career development and youth employability professional based in Shillong, Meghalaya. His work sits at the intersection of career counselling, skill development, job readiness, recruitment, training and workforce development.

He is the Founder & CEO of **The Beginners**, a Meghalaya-based career development and employability organisation that works with students, graduates, educational institutions, employers and government-linked programmes to close the gap between education and employment. His focus is on helping young people understand the changing employment landscape, identify suitable career pathways, build market-relevant skills and connect with real job opportunities.

Over the years, his work has grown from individual career counselling into the design and implementation of institutional, government, CSR and industry-linked programmes covering career awareness, employability training, digital skills, recruitment, assessments and placement support.

He is also the Founder of **The Beginners**, a registered organisation with a broader focus on education, employability, skill development and opportunities for students and youth in Meghalaya.

CORE AREAS OF EXPERTISE

- Career counselling and career awareness
- Youth employability development
- Job readiness and workforce preparation
- Recruitment and candidate screening
- Student and graduate counselling
- Skill development programme implementation
- School and college outreach

- Digital skills and workplace technology
- Communication and soft skills training
- Industry-oriented training programmes
- Government and institutional project coordination
- CSR and education programme implementation
- Training centre and training partner coordination
- Assessment and examination management
- Programme documentation and reporting

PROFESSIONAL EXPERIENCE

Founder & CEO

The Beginners, Shillong, Meghalaya

Subir founded The Beginners as a career guidance and employability organisation, with the aim of building a stronger link between students, skills, employers and employment opportunities. The organisation's approach runs in sequence: career counselling, skill development, job readiness, recruitment and placement support.

The Beginners has worked with students, graduates, schools, colleges, government departments, employers and programme partners across Meghalaya. Key areas of work include:

- Career counselling and pathway guidance
- Career awareness in schools and colleges
- Psychometric and aptitude-based assessments
- Job-readiness training
- Communication and workplace-skills training
- Digital and employability skills
- Candidate sourcing and screening
- Mock interviews and recruitment support
- Job fairs and employer interaction
- Placement facilitation
- Industry-linked training programmes
- Government and institutional programme delivery

GOVERNMENT & INSTITUTIONAL PROGRAMME EXPERIENCE

Directorate of Employment & Craftsmen Training, Government of Meghalaya

The Beginners has worked within Meghalaya's employment and skill-development ecosystem on initiatives to improve the employability and job readiness of young people. The organisation has been involved in the implementation framework for Job Readiness training for eligible ITI students, which covers:

- Communication skills
- Workplace behaviour and work culture
- MS Word and MS Excel
- Internet and research skills
- Google Maps and digital tools
- AI productivity tools
- Financial literacy
- Customer handling
- Cyber safety
- General workplace readiness

The programme is designed to prepare students not only to find employment but to understand what modern workplaces expect of them.

Career Awareness Programme, Meghalaya

Subir is currently involved in developing a state-level Career Awareness Programme to reach students and youth across Meghalaya. A formal proposal was submitted to the Directorate of Sports & Youth Affairs. The framework includes:

- Career awareness sessions
- Career counselling
- Student assessments
- Interaction with counsellors and resource persons
- Education and career pathway awareness
- Exposure to emerging employment opportunities
- Skill and employability awareness
- School and college outreach
- Programme documentation and reporting

The work has involved coordination with government authorities and preparation of the proposal, DPR, verification and departmental documentation needed for wider implementation.

INDUSTRY & EMPLOYMENT LINKAGES

A major part of Subir's work has been building a practical bridge between jobseekers and employers. The Beginners has carried out recruitment and candidate-screening activities across BPO and customer service, hospitality, healthcare, IT/ITeS, retail and service industries, technical trades, and entry-level corporate roles.

Activities conducted include:

- Candidate registration
- CV and profile screening
- Interviews and mock interviews
- Candidate shortlisting
- Employer coordination
- Job fairs
- Offer and joining follow-up
- Relocation support and candidate tracking

The Beginners has also worked with employment-exchange and institutional stakeholders to facilitate employer–jobseeker interactions.

MAJOR PROJECT & PROGRAMME EXPOSURE

PowerGrid: Smart Meter Technician Programme

The Beginners has been involved in implementing a Smart Meter Technician training programme associated with PowerGrid. The programme required practical training infrastructure, candidates, equipment, classroom coordination and on-ground implementation support. Coordination covered Smart Meter Technician training, Recognition of Prior Learning activities, equipment and laboratory requirements, candidate coordination, training delivery, examination and verification processes, and institutional liaison. The experience gave direct exposure to the operational demands of delivering technical skill-development programmes on the ground.

Infosys / Edubridge: Excel & Data Analysis

The Beginners has been involved in programmes that give young people industry-relevant digital skills, including Excel and Data Analysis. The model combined structured training, candidate mobilisation and certification through the programme partners, with the broader aim of improving the digital employability of young people in Meghalaya.

UNICEF: AI Productivity / Employability Initiative

The organisation has been associated with an employability initiative that introduces young people to Artificial Intelligence and AI-enabled productivity tools. The programme centred on practical use of AI to improve productivity and workplace readiness, particularly for young people who may not otherwise have access to advanced technology training.

Hospitality Recruitment & Training

The Beginners has facilitated recruitment and training-related activities for hospitality-sector employers, including candidate mobilisation, screening and coordination for entry-level roles.

Healthcare Recruitment

The organisation has undertaken candidate mobilisation and recruitment support for healthcare-sector opportunities, including engagement with medical colleges and nursing graduates. This included institutional coordination, candidate mobilisation, mock interviews, candidate assessment, employer-facing candidate reports and recruitment coordination.

ASSESSMENT & DIGITAL INFRASTRUCTURE

The Beginners has built experience in technology-enabled candidate assessment and examination management. The organisation operates an online assessment platform accessible on computers and Android devices, through which candidates can take assessments digitally while authorised training partners access the relevant assessment information.

This experience is particularly relevant to large-scale programmes that need:

- Candidate registration
- Digital assessments
- Examination management
- Candidate tracking
- Training partner coordination
- Data management
- Standardised assessment processes

Subir has also been pursuing assessment-related opportunities within the Meghalaya skill-development ecosystem, including engagement with the Meghalaya State Skill Development Society (MSSDS).

EDUCATION & CAREER AWARENESS

A significant part of Subir's work is direct engagement with schools, colleges and students. The Beginners runs programmes that help students understand career options, emerging occupations, required qualifications, industry expectations, skill requirements, higher education pathways, employability skills, personal strengths and interests, and career decision-making.

Its career counselling incorporates psychometric assessment covering personality, interests, aptitude, motivation, occupational profiles and career suitability.

ENTREPRENEURIAL & ECOSYSTEM EXPERIENCE

The Beginners has participated in Meghalaya's startup and entrepreneurship ecosystem and has worked with organisations and initiatives that support innovation, education and youth development. It has been associated with PRIME Meghalaya and took part in the NEICP 2024 programme at the IIT Guwahati Technology Innovation & Commercialization (TIC) ecosystem. This exposure has deepened Subir's understanding of programme development, institutional partnerships, innovation, entrepreneurship and scaling social-impact initiatives.

APPROACH TO YOUTH DEVELOPMENT

Subir's broader objective is to help build a workforce better prepared for the modern economy. He holds that youth development must go beyond giving people information about jobs; young people need a complete pathway from awareness and career direction, through skills and job readiness, to recruitment and employment. When career counselling, skill development and employment facilitation work as connected parts of one process rather than isolated activities, outcomes improve.

ORGANISATIONAL CAPABILITY

Through The Beginners and The Beginners , Subir has developed experience in coordinating a wide range of stakeholders:

- Government departments
- Employment exchanges
- Schools
- Colleges
- Employers
- CSR and industry partners
- Trainers and counsellors
- Students and jobseekers

- Training institutions
- Parents and educational stakeholders

The organisation has experience in candidate mobilisation, training coordination, counselling, assessments, recruitment, documentation and programme reporting.

KEY STRENGTHS

- 1. Local understanding.** A strong grasp of the education, employment and youth ecosystem in Meghalaya, and of the challenges faced by the state's students and jobseekers.
- 2. End-to-end employability approach.** Experience across the full journey, from career awareness and counselling to training, assessment, recruitment and placement facilitation.
- 3. Government and institutional coordination.** Experience preparing proposals, DPRs and programme documentation, and working with government and institutional stakeholders.
- 4. Industry connection.** Experience working with employers to understand vacancies, identify suitable candidates and facilitate recruitment.
- 5. Youth mobilisation.** Experience engaging students, graduates and jobseekers through schools, colleges, employment exchanges and recruitment initiatives.
- 6. Technology-enabled delivery.** Experience with digital assessments, online candidate management and technology-based employability training.
- 7. Programme implementation.** Practical experience executing programmes on the ground rather than limiting activity to counselling or training alone.

PROFESSIONAL VISION

Subir Baruah aims to help build a stronger employability ecosystem in Meghalaya, one in which young people have access to career information, professional guidance, market-relevant skills, industry exposure and employment opportunities.

His long-term objective is a workforce that is aware, skilled, employable and connected to the requirements of the modern job market. Through The Beginners he seeks to work with government, educational institutions, employers and development partners to design and deliver scalable programmes that improve employment outcomes for the youth of Meghalaya.
